

JOSIM UDDIN

JUNIOR MERN STACK DEVELOPER

PROFILE

Junior MERN Stack Developer who has shipped five full-stack applications end to end — from schema design and REST APIs to authentication, Stripe payments, and production deployment on Vercel. Comfortable owning a feature from idea to live product, with a strong focus on clean UI, secure auth, and practical, real-world functionality.

PROJECTS

RecipeHub — Recipe Sharing & Marketplace Platform [Live Demo](#) | [GitHub](#)

Tech Stack: Next.js, React, Node.js, Express.js, MongoDB, Better Auth, Stripe, Tailwind CSS

- Built a full-stack recipe marketplace with community-driven publishing, reaching 1,000+ published recipes and role-based dashboards for regular and premium users.
- Implemented secure authentication (Better Auth/JWT) and Stripe checkout to handle one-time recipe purchases and premium subscription upgrades.
- Developed a discovery experience with filtering, pagination, likes, and favorites to keep browsing fast as the recipe catalog scales.

DocAppoint — Doctor Appointment Booking Platform [Live Demo](#) | [GitHub](#)

Tech Stack: React, Node.js, Express.js, MongoDB

- Built a healthcare booking platform covering 8 medical specialties (Cardiology, Dentistry, Pediatrics, and more) with instant, phone-call-free appointment scheduling.
- Designed doctor and patient dashboards with a verified-doctor system and secure REST API integration between frontend and backend.
- Focused on a fast, mobile-responsive booking flow to reduce friction between finding a specialist and confirming an appointment.

QurbaniHat — Livestock Booking Marketplace [Live Demo](#) | [GitHub](#)

Tech Stack: Next.js, React, Node.js, MongoDB

- Developed a seasonal marketplace connecting buyers with 120+ verified farms for online Qurbani animal booking, listing 500+ animals across multiple breeds.
- Built animal profile pages (breed, age, weight, location, price) and a booking flow with user authentication and profile management.
- Created reusable, component-driven UI to ship listing, detail, and checkout pages quickly and consistently.

DigiTools Platform — Web Tools Platform

Tech Stack: Vite, React, JavaScript, Tailwind CSS

- Built a collection of practical, client-side web tools using reusable React components and interactive state management.

Keen Keeper

Tech Stack: React, JavaScript, Tailwind CSS

- Developed a responsive web application with reusable components, applying modern frontend architecture and best practices.

CORE SKILLS

Frontend: HTML5, CSS3, JavaScript, React.js, Next.js, Tailwind CSS

Backend: Node.js, Express.js, REST API

Database: MongoDB

Other: Authentication, JWT, Better Auth, Stripe, Git/GitHub

INTERESTS

Full-Stack Web Development • UI/UX • Open Source • Problem Solving • Learning New Technologies • Building Real-World Applications
